NEW KANSAS LAW

The operation of the new Kansas law, which went into effect on January 24th, intened to solve labor disputes and insure to the people of the State the uninterrupted production and transportaton of necessities will be watched with keen interest. Kansas, under the leadership of Henry J. Allen, its fighting governor has a reputation for protecting its citizens that is excelled by no other State. There is no doubt in the world that the provisions of he new law will be strictly enforced, and it seems equally certian that it carries a remedy that will largley banish strikes and prevent further sacrifice of the public interest to compel acquiescence in the demands of an unscrupulous few.

The new statute creates the Court of Industrial Relations and clothes it with broad powers. In addition to taking over the duties of he Public Service Commission, the court will have supervision of the production of foodstuffs ,of the manufacture of all clothing, of all mining and fuel production, and of the transportation of all necessities. It is declared illegal to suspend any of the activities mentioned. If a labor controversy threatens such suspension the court may begin an investigation, and amend or change any employmet contract. If either party to the controversy refuses to accede to the court's orders the State may take over the industry and operate it. A fine of $500 or six months in jail is the penalty for striking in violation of the law and any one who orders or ...tes a strike may be fined $1.000 given five years in prison.

The promptness with which the members of the court were appointed by Governor Allen and began to discharge their functions is an indication of the thoroughness with which the provisions of the new law will be administered. Two days after it went into effect 400 coal miners struck. The next day they were back at work, the newly appointed judges were conducting an investigation and Mr. Allen was the recipient of hundreds of telegrams from all parts of the State pledging support in the enforcement of the law.

The officers of the mine workers in Kansas see in the legislation something very inimical to their interests. But it is said the author of the bill is so confident that labor will benefit on the whole from its provisions that he predicts that in two years the labor organizations in the State will be urging the enactment of similar billls elsewhere. While the measure is a protection to the public at large it also provided labor with a means of securing impartial adjudication of its disputes without resort to strikes entailing the loss of large sums in wages and much discomfort and suffering to the workers.

It may be that Kansas has blazed a trail in labor legislation that will be followed by other State governments, and that will have a strong influence on Federal Labor laws of the future. It is probable that it will not be long before an opportunity occurs to test thoroughly the new statute. The open threat of a strike by certain of the railway brotherhoods, and the demands of the other railway employes that may be insistently renewed at any time, are likely to prove whether a State government can protect its citizens or not. If the law vindicates itself a remedy is found.

FINISH THE RAILWAY JOB

"Within a few days the American railway system is scheduled to go back to its owners. Congress, therefore, is now on its last lap of the ... which is indespensable to ... roads. And saving the ... does not mean merely snatching them out of the hands of the ... It means saving them from failure to meet their monthly payrolls. It means saving them from a breakdown which will knock American industry and business galley west and, so doing take out of the mouths of American workers their bread and butter.

Thousands of miles of our railroads are dead broke in spite of the guaranteed rental they are now getting from the Government. Tens of thousands of miles of our railroads would be dead broke without the Governmental rental. The reason is that the railroads of the United States, the big and the little, the good, bad and indifferent, are being eaten alive by their operating expenses.

If the roads stayed in the hands of the Government the colossal deficits they are now piling up would burst even the United States Treasury unless Congress resorted to new taxation. This country is done with higher taxes. So it must be higher traffic rates. Government operation or private operation, there is no getting away from the higher rates if the national transportation system is to be saved.

Pending a carefully worked out programme for the permanent salvation of the roads Congress must make provision for more railway revenues. The relief must be adequate, so that the carriers can live and the public be served. It must be prompt so that the railway executives can prepare in time for what they have to do when the roads go back—N. Y. Sun.

CAR SHORTAGE FACTS

The facts regarding the existing car shortage on the railroads have been well set forth by Senator Kellogg of Minnesota. According to his figures the roads as a whole added 1.0,000 cars on the average in each of the five years before the war. They retired about 90,200 cars per year, leaving a net annual increase in car supply of about 30,000. In the two years and two months during which he roads have been under Federal control only 100,000 cars have been purchased, while the rate of car retirement was even greater than formerly, due to the tremendous increase in traffic on account of the war. Those cars have been less than half those required to take care of ordinary replacements; in other words, there has been a net decrease of 100.000 cars during the period of Fedeeral control. Mr. Kellogg charges that instead of getting busy and turning out cars, the Railroad Administration spent five precious months trying to standardize cars and locomotives. Meanwhile the cost of material went up, shops got busy on other work, and the cars were never forthcoming. What a striking parallel it is between the car situation and other projects of the Wilson administration, such as the airplane program. Instead of adopting designs of approved efficiency ready to hand, production was sacrificed in a vain attempt to remold entire industries.

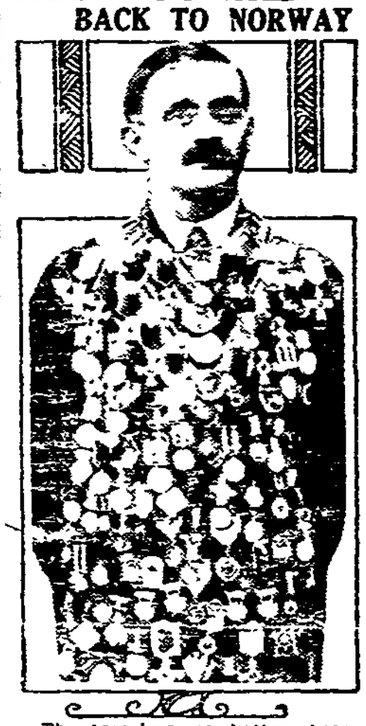
Machinery of Census Bureau.

The ingenious machines used by the census bureau to count, sort and tabulate the information gathered by the census enumerators are the product of the bureau's own laboratory. The sorting machines take care of 300 cards per minute, the counting machine 500 cards a minute and the tabulating machine handles 400 cards each minute.

Danger in New Coin.

The harpist was heaving and snorting with indignation. "Look at this story!" he cried, handing us a copy of the Fourth Estate. The story concerned the campaign for 2½-cent pieces. "If they get this new coin minted," he moaned, "the concert managers are sure to offer it to harp soloists as a fee!"—Musical America.

ICE-SKATING TITLE BACK TO NORWAY



The American ice-skating champion, Bobby McLean of Chicago, failed to defend his world title in a series of races at Christiania, Norway, for a purse of $30,000. The photo above is of the European champion, Oscar Mathieson, who beat him, and who in races here last year was defeated by McLean.

DOUGLAS FIR WIDELY USED

American Tree Attains Splendid Proportions and Is Remarkably Assertive and Prolific.

Douglas fir is the name given to one of the best timber trees in the western part of the country. Specimens are common with a diameter of 15 feet, and travelers in the belt where they grow report having seen them 20 feet in diameter and tapering straight to a height of from 250 to 300 feet.

The coast range of the Sierras provides the best trees. Only the famous redwood and two or three other growths exceed the fir in size and none except the yellow pine produces so much commercial timber. The tree is sometimes styled the Oregon pine, but foresters say it is more of a hemlock. Its botanical name is "false hemlock," although that designation is not generally approved.

It is one of the most assertive and most prolific of timber growths. Foresters say that no other produces so many trees to the acre and when a grove is started it crowds out growths of other species. It finds a wide variety of uses, being made into telegraph poles, ship masts and derrick booms, and is also used for interior finish. Coarse and fine-grained woods are turned out from it, according to the age. The annual rings are not nearly as thick after the first century or so of growth as in the earlier years, and so the same tree may yield more than one grade of timber. Full-grown trees are more than 100 years old.

HUMAN NATURE NOT CHANGED

All Records Show That Mankind Has Remained Much the Same Through the Ages.

Read the oldest records of our race, and you will find the writers holding up to admiration, or relating with heartfelt emotion, the facts that we ourselves most delight in. The fidelity of Joseph to his master, the love of Hector for his wife and child, come home to our hearts as suddenly as to those of the ancient Hebrew among the Syrian mountains, or the pagan Greek in the islands of the Aegean sea . . The first Chaldean who observed that the planets seem to journey among the other stars, and not merely rise and set in with them, that Jupiter and Sirius follow different laws, knew a truth which is now the foundation of astronomy in London and Paris no less than of old in Babylon. The first Egyptian who meditating on curved figures, discerned that there is one in which all the lines from one point to the circumference are equal, gained the idea of a circle, such as it has presented itself to every later man from Thales and Euclid down to Laplace and Herschel. Nay, those who most exalt the requirements of our age compared with the past—and they can hardly be too much exalted—must admit that all progress implies continuity—that we can take a step forward only by having firm footing for the step behind it. —John Sterling.

Early Diving Apparatus.

The first record of the use of an apparatus in diving, says a writer in the Christian Science Monitor, is when Alexander the Great made a descent in a machine which kept him dry and allowed him to obtain air from a reservoir. Pliny writes about divers carrying one end of a leather pipe between their teeth, while the upper end was attached to a floating bladder, but it was not until 1819 that Augustus Siebe constructed an apparatus supplied with compressed air by means of a hand pump, as today. His dress was an open one, with the air entering the top of the helmet and escaping under its edge, so that if the diver stooped the helmet became flooded, and was consequently dangerous. In 1830, however, he designed the closed dress, as now used, with several important improvements.

Before Needles and Thread.

Thorns and fish bones were used as a means of fastening clothing long before the discovery of needles and thread. Among the remains of the lake dwellers of central Europe have been found a great number of pins, some of bone and others of bronze. Some are quite fancy, having ornamental heads, while others are clumsily fashioned. Some have double stems and a few have been found that were made exactly like the safety pins of today. Among Egyptian and Greek ruins have been found many specimens of artistically made pins. Ancient roman bronze pins and bone hairpins, with fancy heads, have been found at Pompeii. The Romans also made very elaborate fibulae, similar to the present day brooch.

The genie that came out of the bottle in the "Arabian Nights" story became, when liberated, a monstrous power. The energy stored in a pint of gasoline is hardly less stupendous.

One pint of gasoline represents 12,000 "B. T. U.'s" of energy. A "B. T. U." (the abbreviation for British thermal unit) will lift 750 pounds one foot. Thus there is in that single pint of innocent looking fluid enough power to lift six tons 750 feet into the air —that is to say, 200 feet higher than the top of Washington monument.—Kansas City Star.

That Bridge Fiend.

"Who is Edith to marry?" "His name is Bridge." "Good gracious! Is she carrying the craze as far as that?"—Boston Transcript.

TAKE WIFE ON MOTOR TOUR

Writer Calls That Real Test of Marriage, Especially If She Can Drive.

Before being taken on a motor tour ... themselves drive should be anesthetized and all knowledge of motors removed, Sinclair Lewis writes in the Saturday Evening Post. For if they know anything about the game it is so hard to explain to them why when you are trying to pass a car on the hill and suddenly see another car bearing down you first step on the accelerator instead of the brake, then retard the spark, yank the gear lever into neutral, grindingly try to get it into reverse or low or anything that is handy, sound the horn, step on the gas again, finally get into second—and then kill the motor.

So dangerous a thing is a little knowledge that in such cases women have been known to doubt your having a perfect reason for all those clever maneuvers.

Motoring is the real test of marriage. After a week of it you either stop and get a divorce or else—free from telephone calls and neighbors and dressing for dinner, slipping past fields blue with flax and ringing with meadowlarks in the fresh morning—you discover again the girl you used to know.

PART OF RELIGIOUS RITES

Hula Dancers Were Trained by Ancient Hawaiians to Take Part in Ceremonies.

Hula dancing long had its established school for the training of dancers in Hawaii. Originally, however, it was not the suggestive dance it is today, having been a religious rite of the ancient Hawaiians. To them the hula occupied the place of our concert hall, lecture room, opera and theater, and was their chief means of social enjoyment. The Hawaiians perpetuated their past, and inspired pure sentiment and lofty purposes by this dancing. The dancers were highly paid artists, not because it was held in disrepute but because the art of the hula was an accomplishment of special education and arduous training, in both song and dance, mostly for religious purposes.

As a religious matter the hula dance was to guard against profanation by the observance of various religious rites. The entire ceremonies were the result of premeditation and organized effort the dancers being selected with great care from the flower of the land including the most beautiful and physically perfect. The actors represented gods and goddesses of old earth come back again.

Most Resistant of Woods.

The redwood is one of the most resistant of woods against fires. It is hard to ignite and slow to burn and fires are easily extinguished. The fire-resistant quality of redwood was well shown at the time of the great San Francisco fire in 1906, when the burned district was fringed with houses built with redwood, which resisted the flames until they could be controlled. Redwood is light, but relative to its weight it is one of the strongest woods known. It is not especially elastic and consequently is not extensively used for structural purposes where timbers are subject to heavy loads. The wood is sufficiently strong and stiff, however, for general house construction purposes, and, in addition, is light and durable. These properties, as well as its ability to keep its shape, make redwood especially valuable for use in the construction of poultry yard appliances, which must resist rot and keep tight in all kinds of weather.

Varied Uses of Coconuts.

Coconuts have long been considered one of the most valuable products of the tropics. The palm grows wild and is utilized in many ways by the natives. The meat of the nut, eaten raw or cooked, forms an important article of food and the liquid contained in the center of the nut a most refreshing drink; the sap from the unopened flower buds is also used as a drink and is highly intoxicating if allowed to ferment for some time; the husk of the nut is used for fuel and its fibers to make rope, matting and brushes; the shell of the nut is used for fuel, for drinking cups and various household utensils; the leaves and the wood of the palm are utilized for mats, thatching and timber for huts.

The earliest needles known in history did not have eyes, but were like awls and were used for making holes in skins, through which long roots of plants or leather thongs were passed and then tied. Later a hole was bored through one end of the stone or bronze needle, through which the root or leather was passed, and thus dragged through the hides as punched. Such needles are found in the remains of the stone age. Bone needles with eyes are found in the reindeer caves of France and lake dwellings of central Europe.

Water Raised by Endless Belt.

The oddest of recent English productions is the spiral-spring belt pump, claimed to raise 1,000 gallons of water per hour from a depth of 300 feet, even when operated by hand. The endless belt is mounted on a grooved pulley having vertical position by a loose grooved weight in the bottom loop. The water held in the urns of the spiral is discharged as the belt goes over the top in its regular rotation.

NOTICE

Private Sale of Real Estate In the Estate of Emilia Demarco Volante, Deceased

Notice is hereby given that the undersigned, Frederick Antonio Volante, will present a petition to the Orphans Court of Washington County, Pennsylvania, at ten o'clock a. m., Monday March 15th, 1920 for a Decree authorizing and approving the private sale, to Henry Gears of all the right, title and interest of the heirs of Emilia Demarco Volante, deceased, of, in and to all that certain lot or parcel of ground situated in the Borough of Charleroi, Washington County, Pennsylvania, more particularly bounded and described as follows, to wit:

WHEN A MAN IS DOWN AND OUT

with a miserable cold he just can't do his work properly and feel so contemptibly unhappy. SIM-CO SALVE is guaranteed to relieve cold in the head or on the lungs almost immediately, because it is an antiseptic salve, that gives off refreshing antiseptic vapors for inhalation, thus reaching the innermost parts of the lungs at the same time that it is relieving the throat or chest by application. Just get a 30c jar at F. J. Johns and apply it at night sleep well with the air passages of the head opened and get up feeling fresh and relieved in the morning.

Millions of germs breed in these colds. It is reasonable to suppose you can't kill lagrippe germs and cure the disease quickly without an antiseptic, so why not try the new remedy SIM-CO SALVE?

It is amighty good ointment to have on hand for cuts, sores, bruises burns, itching piles, eczema, tetter, rash or other similar affections. It is so soft and pliable that it is especially adapted for rubbing and soon dispels your agonizing aches from sore muscles stiff neck, neuralgia and sprains.

F. J. John who is the agent in Charleroi, is authorzed to refund the purchase price if SIM-CO SALVE does not do all that is claimed for it; can you expect a more generous offer?

Get a jar today and be prepared. 30c 60c and $1.00 per jar. If your druggist does not keep it, order from Wm. M. Smpson Drug Co. Wholesale Druggists, Wilkinsburg Station, Pittsburg, Pa.

John Husovitz, aged 47, a resident of Charleroi, died at the county home on Monday. The body will be brought to Charleroi and funeral will be held on Thursday, with interment in Charleroi cemetery.

Born to Mr. and Mrs. Ralph Hickey February 23—a daughter, Mary Elizabeth.

MONESSEN POLICE RAIDE PUNCH BOARDS

he police of Monessen made a raid on punch boards and other games of chance in that borough between 10 and 11 o'clock last Saturday night, and visited about twenty pool rooms and confectioneries where these boards were in use. The proprietors were told to appear before the Burgess Tuesday morning, when all of them were fined in amounts rangng from $5 to $15 each. The police ordered the slot machines out of the borough some time ago, and it is believed that all such devices have been banished from that town.

CIVIL WAR VETTRAN IS CALLED BY DEATH

At the home of his daughter Mrs. John Stacber, near Ginger Hill, Saturday afternoon last, occurred the death of Thomas Turnbull Spence a well known and respected citizen of the Monongahela community. Death was due to apoplexy and followed by an illness of but 24 hours. Mr. Spence was born in Castle Eden, county Durham, England, in 1840, and came to this country when but a young man. He served in the civil war as a member of Company G, 98th Ohio, and later with the 19th Indiana Battery. Services were held this afternoon at 3 o'clock with interment in Monongahela cemetery

The flu epidemic, which visited Charleroi recently apparently has passed on, as practically no cases of this malady are now being reported by local physicians.

COYLE THEATRE

FRIDAY and SATURDAY

HIS PERSONALITY

was so great and affection for him so marked, that his birthday was publicly celebrated for years before his death.

So it is written of Washington.

Few men, and they supremely great may receive this high honor, a birthday nationally observed.

We cannot all be famous, but we may all be honored. The nearer we approach the character, the unselfish spirit that made Washington's personality what it was, the wider grows our circle of friends.

BANK OF CHARLEROI

Charleroi, Pennsylvania

Washer Wringer

First Payment Only $5.00
Balance on Easy Terms

After two weeks' trial you pay $5.00 provided you are entirely satisfied with the Gainaday. Then you have a whole month before the next small payment is due.

Demonstration in Your Own Home

Give us the chance and we'll show you every step in the simple Gainaday process of washing and wringing clothes by doing a week's wash for you in your own home. We'll wash every kind of clothes so you can see how handy the Gainaday washes dainty laces and linens just as well as the heavy soiled clothes. The Gainaday pays for itself; it's an investment no Gainaday owner has ever regretted.

REGAN & HORMELL

LITTLE GOOD IN ARGUMENT

Many Men of Note Have Set It Down as a Useless Form of Bickering.

Lord Fisher, not arguing, of course, with his opponents, but just telling them, renewed a discussion with the remark: "It is only fools who argue."

Something of the sort has been said before. In Plutarch you find:

"Euripides was wont to say, silence was in answer to a wise man; but we seem to have greater occasion for it in our dealings with fools and unreasonable persons, for men of breeding and good sense will be satisfied with reason and fair words."

Jonathan Swift wrote:

"Argument, as usually managed, is the worst sort of conversation, as in books it is generally the worst sort of reading."

James Russell Lowell gave this advice:

"There is no good in argument with the inevitable. The only argument available with an east wind is to put on your overcoat."

In Samuel Butler's Notebook, which holds much common sense, is an entry to the point:

"Argument is general waste of time and trouble. It is better to present one's own opinion, and leave it to stick or no, as it may happen. If sound, it will probably in the end stick, and that is the main thing."

If you are still fool enough to argue don't let the other fellow do so. Remember Mr. Godkin's penetrating warning that "hearing both sides confuses the mind."

SCULPTOR FOUND IN ERROR

Stonemason Had to Be Called In to Shave the Bust of John Howard Payne.

"The man who never had a home"—meaning John Howard Payne, of course—also never had a beard.

When the author of "Home, Sweet Home" had died in Tunis and his body was being brought back at the expense of W. W. Corcoran the newspapers broke out all over in a beautiful something about "the man who never had a home and was coming home at last." And when Mr. Corcoran had erected a monument at the poet's grave in Oak Hill, about all Washington attended the dedication ceremonies, either as privileged spectators inside the cemetery or just plain people packed against the railings on the street side—which, generally speaking, folks, is a good place to be, so far as graveyards are concerned—but, anyhow:

The bust of Payne that topped the marble shaft showed a dreamy face bearded like unto the gentleman of western literature usually mentioned as a "pard." And everybody said what a manly man he must have been, but—you know how things get around—after the impressive ceremonies were over—say about two weeks—the town become aware that the late Mr. Payne never wore a beard.

And the next thing that happened: he was shaved by a stonemason.—Washington Star.

Ancient Oath Found.

The Bucks County (Pa.) Historical society has come into the possession of a well preserved manuscript copy of an oath of allegiance and renunciation taken by aliens in this country about 1730. The allegiance is sworn to George II, acclaimed as ruler of Great Britain.

The oath was administered about the time that many Germans and Swiss were emigrating to this country and an act was adopted in 1727 setting forth that all aliens must take oath of allegiance to King George. The oath was administered to all males over sixteen years as soon after their arrival in this country as possible.

The manuscript which the historical society has is that of the oath taken by George Kinkner of Southampton township in 1730.—Nyack Evening Journal.

Aviation and the Compass.

Many aviators firmly believe that there are magnetic currents or disturbances in the upper air which affect the compass and make it "go crazy." Long experiments and careful investigation, however, seem to prove conclusively that it is not the compass, but the plane which moves distractedly, in the first place, and that the apparent insanity of the compass is due to these movements and the vertical magnetic component of the governing force. The maddest of compasses, the most contradictory and insane of cards, will steady down to a quiet behavior once the plane is on a straight, level course for a period of time greater than the period of the compass.

How Needles Are Made.

It was not until after 1885 that needles were entirely made and finished by machinery. The present-day process of making needles may be described as follows: The first operation is to cut the needle wire into eight-foot lengths; this is done by winding it into a coil of sixteen feet circumference and then cutting this coil into exact halves with powerful cutting shears. The coiling of the wire is so managed that there are 100 pieces in each half when cut.

A Backhander.

Caller (on being shown photograph)—So that is your husband, is it? I knew he must be good looking—your children are so pretty.—Boston Transcript.

Knights of Malta.

The order of the Knights of Malta is of great antiquity and is supposed to have originated during the first crusades, from about 1070 to 1090. After the capture of Jerusalem, the order was founded by Gerard, who died in 1120.

Steel Needles Chinese Invention.

The Chinese were the first people in the world to use steel needles. The Chinese needles slowly made their way westward until they were brought into Europe by the Moors.

Co-Operative Plan in Japan.

Co-operation in Europe and America is youthful as compared with the movement in Japan. Co-operative societies for the sale of silk date back to the middle of the seventeenth century.

"Bessie, why don't you try to be a good little girl?" "I do try awfully hard." "But you don't succeed very well." "Why, mother, just think how bad I'd be if I didn't try at all."—Life.

Reached Its Destination.

A little boy was given a penny to give to the Lord at church. He returned home to report that not seeing God around he gave his penny to the man with a plate.

China has more suicides than any other country in the world. In a single year as many as half a million cases of self-destruction have been recorded.

How About the Listeners?

To hang on the organ; motto for the average choral society: "Lord, have mercy on us miserable singers!"—Judge.

Trees That Have Long Life.

Brazilian coconut palms live from 600 to 700 years, and the date palm from 200 to 300 years. On the Mount of Olives, Jerusalem, there are olive trees known to have been flourishing in 1099.

Where the Feathers Go.

"A man might succeed in feathering his own nest," remarked the Observer of Events and Things, "if so much of his money didn't go toward putting them on his wife's hats."

Gets Shaken Into Place.

"Occasionally," said Senator Sorghum, "a man starts as a leader and then has to go with all his might to keep at the head of his own procession."

It Makes a Difference.

The man who tries to reform others is an inspired missionary. The man who tries to reform you is a hypocritical humbug.—Cincinnati Enquirer.

A habitual falsifier always seems able to get a number of people interested in the hope that some day they'll catch him in the truth.

Forgot It.

A slang expression which ought to be applied like a sticking plaster to a large proportion of our schemes to get rich.—Exchange.

New Musical Instrument.

New in the musical instrument line is a whistle with two tubes that is played like a slide trombone.

Use Water Sparingly.

An Arab drinks cold water with a spoon, and never bathes in it unless his home be on the seashore.

WOMEN NEED NOT STAND IT

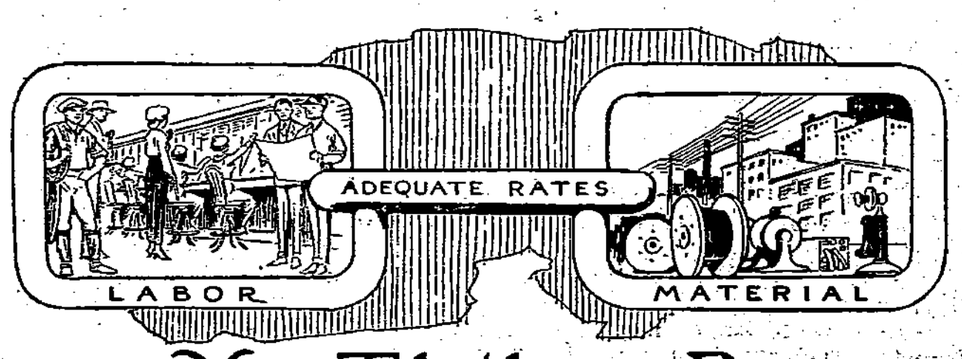
Lydia E. Pinkham's Vegetable Compound Surely Removes Suffering and Pain. Here is Proof.

St. Paul, Neb.—"I suffered with periodical pain for about four years so that I was unable to do my work at times. A friend told me about Lydia E. Pinkham's Vegetable Compound and I took it. It soon stopped all my suffering so that I am now feeling fine in every way. I recommend your medicine to my friends who have similar troubles. You may publish this letter for the benefit of other women."—Mrs. Will Thomas, St. Paul, Neb.

Lydia E. Pinkham's Vegetable Compound, made from native roots and herbs, contains no narcotic or harmful drugs, and today holds the record of being the most successful remedy for female ills we know of, and thousands of voluntary testimonials on file in the Pinkham laboratory at Lynn, Mass., seem to prove this fact.

For forty years it has been the standard remedy for female ills, and has restored the health of thousands of women who now are free from suffering by its use.

Miss Teressa Mentzer of Monongahela, and Charles Connelly of Charleroi were Pittsburg visitors Saturday evening and attended the performance at the Alvin.



Your Telephone Rates—

IN telephone operations there are two great classes of costs—labor and materials. And in each class we're experiencing just what every manufacturer, every manager, every householder is—*the still prevailing high prices.*

Our costs of furnishing service have practically doubled.

Our rates are what they were before the war.

First-class service cannot be furnished if our income is insufficient to pay the bill. Capital to expand and improve the plant and the business as a whole is not available if investors are not guaranteed a fair return on their money.

It is *our* duty to ask the Public Service Commission for adequate rates.

It is *your* obligation to appreciate the situation, remembering what the service means to you, what reliance you place on it, and what the consequences will be if we must give up not only the expectation of improvement and advancement, but also the grip we have held on the situation during the past few years.

THE CHARLEROI MAIL

VOLUME XX—NO 222 CHARLEROI, WASHINGTON COUNTY, PENNSYLVANIA TUESDAY, FEBRUARY 24, 1920 TWO CENTS

INTOXICATION NO EXCUSE FOR COMMITTING MURDER

Man Assumes All Responsibility when He Begins To Drink

THIS IS DECISION OF COURT

In court at Washington on Monday, in the case against James McMonigal, who entered a plea to voluntary manslaughter for the killing of Charles F. Buckhold, District Attorney Cummins in a satement to the court said that all of the parties engaged in the fight and subsequent killing were intoxicated. Attorney D. M. McCloskey for the defense, made a plea for mercy and presented a number of letters from Charleroi residents as to the good character of the defendant. These letters were from Burgess Woodward, Deputy Coroner M T Crowley. George Newton, E. E. Rice and John T. Ferry.

When asked if he had anything to say McMonigal told the court that he remembered nothing of the circumstances in which Buckhold lost his life.

Judge McIlvaine was not inclined to pass over this matter lightly or to excuse the defendant on the grounds that he was intoxicated. In passing sentence he said:

"This case is like the one we have just disposed of a moment ago, attributable to the use of liquor in excess, so that the participants in that fight, perhaps all of them, had very little knowledge of what was going on. But we must recollect that this defendant, as well as the others, were under no compulsion to get drunk. It was a voluntary action on their part, with the knowledge that they must have had that men under the influence of liquor, especially to an excessive extent do things that they are sorry for ever afterwards; therefore, the court cannot excuse this offense because the man was drunk, and drunk to such an extent that he had no recollection of what happened. Of course those things negative malice and justified the district attorney in accepting the plea of voluntary manslaughter after the case had been almost finished on the part of the commonwealth. It is a sad thing, but I have no doubt that everyone sympathizes with the defendant and his family. I am sure I do. And as in all cases of this kind, innocent persons have to suffer with the guilty, and the wives, and children, and mothers and sisters in cases like this go home, of course, with a sad heart.

"But, still, it would never do to say that the majesty of the law should not be vindicated and that there should be no law regulating society and the conduct of men. Men get drunk voluntarily; they implicitly agree that they will be responsible for what they do, and they are under obligations to the commonwealth to be orderly and law-abiding when they are drunk, if they insist on the privilege of getting that way. We may hope that in the years to come these pleas will not be so often made, but men will see the wisdom that the great government of the United States has shown in prohibiting the manufacture for sale and use, as a beverage, of intoxicating liquors. I do not see why men would justify things that would bring such scenes into court and other places as are brought by the excessive use of intoxicating liquors."

MRS. FRANCES PHILLIPS IS CALLED BY DEATH

Mrs. Frances Phillips, aged 73 years, died at her home in California Saturday morning. She was a native of Washington county and had resided in California for 60 years. She was a member of the Methodist church, and was active in its work. One son, Attorney Charles E. Phillips of Washington, survives. Funeral services were held Tuesday morning at 10 o'clock, interment in Highland cemetery.

THEIR CURIOSITY WAS SATISFIED

District Attorney Cummins before Judge McIlvaine passed sentence on Gillespie and Harclerod convicted last week on a charge of holding up a young man on McKean avenue, Charleroi, said that he had investigated Gillespie's record and found that the authorities of Allegheny county want him for the robbery of from $600 to $800 from Peterson & Co., of Pittsburg. Nothing was known of Harcelrod's past record. In passing sentence said he felt satisfied the verdict of the jury was justified; that it was apparent from the testimony they were both drunk and out for a lark. This was shown by the fact that they held up a boy 19 years old who had no money. They started out after women and then evidently wanted to see how it would go to hold up some one, and they found out. The court stated there was too much of that kind of work going on at the present time.

MAKE GOOD RUN WITH BUICK CARS

Vint Reeves, in charge of twelve Buick cars, arrived at the Spencer garage Sunday evening at 5 o'clock, having driven through from Flint, Michigan, in good time and without mishap. The party left the factory Friday evening and ran to Pantiac, where they remained over night. On Saturday they drove to Columbus, where they put up Saturday night, and on Sunday drove to Charleroi. They found the roads in better condition than anticipated.

Mrs. Lucy Cupp formerly Miss Lucy Vanklemputte, of Charleroi, and Stephen Mayernick of Donora, were married at Detroit Mich., on Thursday, February 19, where they will make their home.

OUR NEW SECRETARY OF THE INTERIOR

Here is the newest member of President Wilson's cabinet It is Judge John Barton Payne, former chairman of the U S Shipping Board, who succeeds Mr Lane as secretary of interior Mr Lane resigned. It was Secretary Payne who ordered the sale of certain German merchantmen held by our government.

SCHOOL SITUATION IS QUIET IN MONONGAHELA

School affairs in Monongahela, where ten of the high school teachers are on a strike, are very quiet today. No additional classes have been added only the Seniors and Juniors being at school. Superintendent Dean is looking about for instructors, and upon his success in getting substitutes will depend the length of the high school term.

CHARLEROI GIRL TO WED ON WEDNESDAY

The wedding of Miss Violet M. Evans, daughter of Mr. and Mrs. William Evans of Charleroi, and William A. Rigby, son of Mr. and Mrs. John Rigby of Elizabeth, will take place tomorrow afternoon at 5:30 o'clock in the home of the officiating clergyman, the Rev. T. Stacy Capers of Ben Avon. Mrs. John D. Case of North Belle Vernon will be matron of honor and John D Case will be best man A dinner and reception at the Willaim Penn Hotel will folow the service

Superintendent T. L. Pollock of the local public school is in Cleveland this week attending the Superintendent's Division of the National Education Association. The sessions will continue until Friday afternoon. Supt. Gress of Monessen acompanied Prof. Pollock.

In the list of marine ways on the Monongahela river, mention of which was made yesterday, the Alica ways at Brownsivlle, and owned by the Pittsburg Steel company, was omitted. These ways were built under direction of Capt. W. Harry Brown, a practical river man and are said to be the most complete on the river.

Mrs. Vivia Stewart is at her home of her sister, Mrs. Frank Bebout, Monongahela, where she has been quite ill for several days. Her condition at present is reported as being quite improved.

William Tomlinson, formerly a resident of Charleroi, now living in Philadelphia, is spending a few days visiting with Charleroi friends.

ARREST COUPLE AFTER WALKING FROM DONORA

A boy and a girl, who gave their names at Robert Miller, aged 16, and Mrs. Ruth Axton, aged 16, both of Donora, were arrested Monday in the Pittsburg and Lake Erie railroad station at Pittsburg and were held in the South Thirteenth police station. According to the police, the girl-wife left her husband n Donora and with Miller walked from Donora to Pittsburg.

DIES AT ADVANCED AGE OF 101 YEARS

After living almost 101 years, the death occurred on Sunday of Mrs. Nancy Gamiel, at the home of her daughter, Mrs. D. S. Pringle, New Eagle. Mrs. Gamiel was in unusually good health until last week, when she contracted a cold and death quickly followed. She was born March 10, 1819, at Dunkard creek, Greene county, and lived all of her life in this section of Pennsylvania. Funeral services were held this afternoon at 2 o'clock from the First Baptist church of Belle Vernon with interment in Belle Vernon cemetery.

Mrs. Hester Kent

Mrs. Hester Kent, wife of Samuel Kent, died at the family home, Coal Centre, Sunday evening, February 22 in the 82nd year of her age. She is survived by her husband and four sons. Funeral services will be held from the home W ednesday afternoon at one o'clock, interment to follow at Howe cemetery.

Arthur Malfaire

Arthur Malfaire died at his home on Washington avenue, Tuesday morning, February 24 of pneumonia aged 54 years. Funeral on Thursday, February 26, at 2 o'clock p. m.. interment in Belle Vernon cemetery. The deceased is survived by his widow and three children.

Mrs. Catherine Cosner

Mrs. Catherine Cosner died at her home, 811 Shady avenue, Monday, February 23, aged 58 years. Funeral services with Requiem High Mass at St. Jerome's Catholic church, Thursday morning at 9 o'clock, with interment in Calvary cemetery.

UNIONTOWN TO BE DIVISION POINT FOR THE PENNSYLVANIA

Offices May Be Moved From 30th St. to Fayette County

TO CONSOLIDATE MANAGEMENT

Uniontown is to become a division operating headquarters of the Pennsylvania Railroad company under the reorganizaton to be effected when the roads are returned to their private owners on the first of March. These reports have been current for the past ten days, both in and out of railroad circles, and were officially confirmed on Monday by the Pennsylvania Railroad management.

Under the reorganization of the Pennsylvania lines the old division of Pennsylvania east and west are discarded and four district terminals are created with a vce president in charge of each district. A terminal, it is learned, is to be established at Pittsburg, and the assumption is that the Uniontown operatng headquarters, if established, will be under the jurisdiction of Pittburg terminal officials.

A consolidation of the Southwest and P. V. & C. branches of the Pennsylvania, togeher with the various branches radiating from them is to be effected to form the territory for the Uniontown division. One report is that the jurisdiction will extend to Fairmont, taking in the old B. & N. road owned jointly by the Pennsylvania and the New York Central lines, and operated by the Monongahela Railways company. Another report is to the effect that the Youngwood yards, near Youngstown, Ohio, would be under the jurisdiction of the Uniontown terminal. It is also intimated that a number of changes in the passenger schedules will take effect within a few days after the roads are taken over by the private owners.

The officers which would be moved to Uniontown under the arrangement are now at 30th street, South Side, Pitsburg, with A. W. McClellan in charge.

MONESSEN DEFTATS THE DONORA TEAM

The Monessen high school basket ball team defeated the Donora high team, on the floor of the former team last Saturday night, by s acore of 23 to 19. Monessen played a great game, the presence of two juniors in the line-up, both of whom played a great game, being most encouraging to the coach. As a preliminary the Monessen high girls beat the California girls by a score of 15 to 6.

HON. CLINTON N. HOWARD

The Little Giant of Oratory, Who Is To Officiate at the Bone Dry Wake for John Barleycorn.

Hon. Clinton N. Howard of Rochester, N. Y., better known as the Little Giant" of oratory and reform, as been engaged as the speaker for a Jubilee Mass meeting to be held in the Washington Avenue Presyterian church, Thursday evening, February 26, 1920 under the auspices of the Woman's Christian Temperance Union.

Mr. Howard is spoken of as one of the most popular speakers in the war drives and camps during the war. Mr. Howard has been a Chautauqua lecturer and lyceum speaker of national reputation for the last twenty yeas, discussing current, patriotic and reform topics, but perhaps the most fascinating lecture is one he is scheduled to deliver here Thursday, entitled, "A Joy-ride to the Grave of John Barleycorn," which is s aid to be a mirth-provoking oration appropriate for the obsequies of the John B. The meeting is open to the public and every ne is invited to be in attendance.

IMPORTANT MEETING OF BOARD OF TRADE

The regulr monthly meeting of the Charleroi Board of Trade will be held in the borough building, Thursday evening, February 26, 1920 at 8 o'clock. Directors to serve for the coming year are to be elected. The fares charged by the Pittsburg Street Railways company will also be discussed.

TO PLAY MUNHALL THIS EVENING

This evening the Charleroi High School basketball team will play the Munhall High School basketball team at Munhall. This game is of much interest to local fans because a victory for the locals will give them a chance to gain first place in Section IV of the W. P. I. A. L. If the locals win this evening Monessen will be force to either play two games with the Charleroi team or forfeit them.
